

Yellowstone National Park

September, 2010

We visited Yellowstone National Park on September 8th and 9th.

Here are some memorable photos from this trip

Yellowstone National Park

September, 2010

The geysers of Yellowstone were fascinating. Yellowstone was once a volcano and thus the hot springs below erupt periodically and they form colorful basins and formations.

Yellowstone National Park

September, 2010

Beautiful vistas of Yellowstone. Yellowstone is a composite of all our national parks: Yosemite, Grand Canyon, Smoky Mountains, etc. Almost every scenic feature in America is contained within this one national park.
